

Virt machine

```
qemu-system-xtensa -cpu dc233c -M virt -m 2G -nographic -semihosting \  
-monitor null -serial mon:stdio \  
-device virtio-blk-pci,drive=vd0 \  
-drive file=~/.ws/tensilica/buildroot/build-xtensa-  
testing/images/rootfs.ext2.orig,format=raw,id=vd0 \  
-device virtio-rng-pci \  
-device virtio-gpu-pci \  
-s \  
-kernel builds/default-virt-dc233c/arch/xtensa/boot/Image.elf \  
-append 'console=ttyS0,115200n8 debug root=/dev/vda'
```

Use console=tty0 for console on FB VT.
