2025/11/05 15:38 1/1 Green mesh roadmap

# **Green mesh roadmap**

### 2H2012

- \* Power save modes implementation in NS3.
- \* Finalizing process mining approach description.

#### 1H2013

- Math model for mobile nodes for with PSM. Formal problem definition
- Simulation in NS3

## 2H2013

- Algorithm for collaborative power saving/management for mesh built on top of PSM
- RFC draft for algorithm

### 1H2014

- PSM implementation in linux (Guess somebody like Marko has finished by this time)
- Real life test bed, understanding of nodes collaboration patterns
- Are there patterns and ?

### 2H2014

- Algorithm implementation, analysis,...
- Joint math/life testing. Model tuning.
