Green mesh roadmap

2H2012

```
* Power save modes implementation in NS3.
* Finalizing process mining approach description.
```

1H2013

- Math model for mobile nodes for with PSM. Formal problem definition
- Simulation in NS3

2H2013

- Algorithm for collaborative power saving/management for mesh built on top of PSM
- RFC draft for algorithm

1H2014

- PSM implementation in linux (Guess somebody like Marko has finished by this time)
- Real life test bed, understanding of nodes collaboration patterns
- Are there patterns and ?

2H2014

- Algorithm implementation, analysis,...
- Joint math/life testing. Model tuning.
