## Green mesh roadmap

**2H2012**

- Power save modes implementation in NS3.
- Finalizing process mining approach description.

**1H2013**

- Math model for mobile nodes for with PSM. Formal problem definition
- Simulation in NS3

**2H2013**

- Algorithm for collaborative power saving/management for mesh built on top of PSM
- RFC draft for algorithm

**1H2014**

- PSM implementation in linux (Guess somebody like Marko has finished by this time)
- Real life test bed, understanding of nodes collaboration patterns
- Are there patterns and ?

**2H2014**

- Algorithm implementation, analysis,...
- Joint math/life testing. Model tuning.
